DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 7, 8, 9, 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Wang, 6775885.

Regarding the claims, Wang discloses a slide fastener having

- a resin stopper portion (2 or 3, col. 4, lines 49-50) comprising
 - an upper and lower leg sandwiching a side edge of the fastener tape (figures 3 and 4) with a bent portion connecting the upper and lower legs
 - a rib-like protrusion (leftmost portion of stoppers as seen in figure 3) extending inwardly from the bent portion of the stopper, curved along the longitudinal direction of the tape, which can be consider

to be extending linearly along the bent portion, and also positioned along a boundary between the legs and the bent portion and on a surface of the bent portion

- o a bottom face of the stopper portion located below a bottom face of the fastener tape main body (3, 7, figure 4)
